EXPERTISE

Core Frontend:

React JS, JavaScript, Redux Saga
CSS, HTML5, Typescript, Node JS
Styled Component

Testing & Tools:

Jest, Git, Visual Studio, Postman
Jira, ALM, CI/CD, AI Tools

Other:

RESTful APIs, Hooks, Context API
Agile/Scrum Development

EDUCATION

BACHELOR OF ENGINEERING

Computer Science
K.L.S. Gogte Institute of Technology
Belagavi, Karnataka
2017 – 2020

DIPLOMA IN COMPUTER SCIENCE

Government Polytechnic Siddapur,
Uttara Kannada Karnataka
2014 – 2017

ACTIVITIES& INTERESTS

Volleyball sport
Traveling
Coding
Following Technology Trends

PROFILE

Frontend Developer with **4+ years of experience** in building scalable, high performance web applications using React.js, Redux-Saga, TypeScript, and JavaScript. Worked on large-scale enterprise web platforms involving inventory, scheduling, order management, user workflows, custom components, and multi-region feature rollouts. Skilled in responsive UI development, state management, reusable architecture, API integration, debugging, and Agile delivery.

WORK EXPERIENCE

Technology Analyst

Infosys Ltd | Mysore

Dec 2021– Present

MEDTRONIC

Working as Frontend Developer,

- Developed reusable and scalable UI components for a global enterprise web application used across multiple regions (US, EMEA, Japan & ANZ).
- Built functionalities for modules such as inventory, scheduling workflows, order creation, user/role-based screens, and configurable UI flows.
- Integrated REST APIs and implemented asynchronous operations using Redux-Saga at scale.
- Converted Figma designs into fully responsive and accessible UI using Styled Components.
- Improved application performance through memorization, optimized API interactions, and reduced unnecessary renders.
- Fixed production defects, raised merge requests, and used AI tools to generate test scenarios and write defect test cases.
- Contributed to multi-region deployments with configuration-based UI handling, localization support, and feature flags.
- Participated in Agile ceremonies, sprint planning, code reviews, and delivered production-ready UI components with Jest tests.

Infosys Internal Project

React Js performance optimization

- Worked on an internal React JS performance optimization for knowledge sharing.
- Analyzed performance issues and optimized component re-rendering.
- Implemented memorization and lazy loading to improve application efficiency.
- Presented the POC and best practices to the internal source/team, later adopted in projects.

CERTIFICATES & ACHIEVEMENTS

- Certification: ReactJS Developer Program, Responsive Web Designing by Infosys
- Certification: Microsoft Azure Fundamentals (AZ-900) by Microsoft
- Won first prize in state level project exhibition for diploma academic project.
- Led my team to victory as the captain in the VTU Zonal Volleyball Tournament
